Transportation & 20-Year Transportation Plan	Page 230

---

Please Note: Project costs listed in the CIP include the total estimated costs of the entire project. These costs may include design, construction, right-of-way, etc. The scheduling of projects is estimated and revised annually. Design and right-of-way acquisition are generally the first costs of a project; therefore, estimated costs that show in a given year do not necessarily indicate construction will occur in that year.

---

# **2023-2027 CAPITAL IMPROVEMENT PLAN**

## **INTRODUCTION**

The Capital Improvement Plan (CIP) is a strategic planning and fiscal management tool which identifies proposed capital improvements, over a multi-year period (usually 5 years). Capital improvements refer to major, non-recurring physical expenditures such as land, buildings, public infrastructure and equipment with a cost in excess of \$10,000. Olmsted County annually reviews and updates the Five-Year Capital Improvement Plan (CIP). The annual review process allows the County Board and staff to reassess financial capacity and make adjustments to the plan due to the changing community needs, strategic priorities, and funding opportunities.

A capital improvement may be defined as a major, non-recurring, expenditure for physical facilities such as construction of buildings, highways, bridges, flood control structures, parks, purchase of vehicles and equipment, land acquisition and similar expenditures. The Capital Improvement Plan is directly linked to the strategic priorities and goals of the County Board of Commissioners and indicates the policy direction for the development and maintenance of county facilities and infrastructure. The primary objective of the Capital Improvement Plan decision-making process is to integrate specific goals and strategic priorities with project scheduling and financial planning. The adopted Capital Improvement Plan is a flexible five-year action plan for major public improvements. The first year of the Capital Improvement Plan, known as the capital budget, outlines specific projects and funding for those projects and is adopted in conjunction with the County's annual operating budget in December of the prior year. The County Board then has a better understanding of the demands on the current and projected future financial resources. Projects and financing sources outlined for subsequent years are not authorized until the annual budget for those years is legally adopted. The out years serve as a guide for future planning and are subject to further review and modification.

Certainly, there are more needs than available dollars. The adopted Five-Year Capital Improvement Plan should be a document identifying the County Board's intention to provide financial resources to fund the projects identified in the program. However, as stated above, this document is updated annually based on changing community needs, strategic priorities and funding opportunities.

## **PURPOSE**

The Capital Improvement Plan is not mandated, however the CIP is a very important long term planning tool. It gives the County Board and the citizens of Olmsted County a road map of what capital improvements and associated costs are on the horizon.

Benefits derived from using the capital budgeting process:

1. Coordination of multi-agency governmental and private improvement projects requiring adequate planning, design, land acquisition and construction. Reduces duplication of effort and expenses for planning and preliminary engineering.
2. Published document provides policy direction of major public improvement projects. The public is informed on the Board's intentions.

3. A systematic approach to project scheduling and capital financial planning. Provides staff with the County Board's policy guidelines to assist in more efficient and effective management of available resources.
4. CIP documents are viewed favorably by bond rating agencies. It demonstrates strategic long-term planning and shows that a governmental agency is planning and discussing financing plan well in advance of projects.
5. The County is required to adopt a CIP if Capital Improvement Bonds will be issued to finance projects. Capital Improvement Bonds are the least restrictive type of financing available to the County. There is a limit to how much CIP debt can be issued so it is very important to plan ahead and use this capacity wisely.
6. The CIP is very important to the Transportation department. There are approximately 1,800 miles of road and 342 bridges (greater than 10ft in length) in Olmsted County that we are responsible to maintain and improve upon when necessary. Transportation accounts for 50%, on average, of total capital expenditures for Olmsted County over each 5 year period. It is absolutely critical that we have a planning tool for the Transportation department to show their needs when talking to County, State and Federal officials regarding funding. It is also imperative that this be looked at annually in order to update needs and priorities as they change from year to year.

## **SOURCE OF FUNDS DEFINITIONS**

The following is a brief description of the source of funds used to finance the Capital Improvement Program.

### **CITIES AND TOWNSHIPS**

These funding sources are related to joint projects on a cost-sharing basis. They are determined on a project-by-project basis.

### **DEBT**

Olmsted County is able to issue several types of bonds including general obligation bonds, general obligation revenue bonds and revenue bonds, as well as others. Olmsted County debt has earned a AAA/Aaa credit rating (with a stable outlook) – the highest possible rating – from credit rating agencies. These ratings designations equate to significant taxpayer savings by lowering the cost of borrowing for the county. Olmsted County received the AAA/Aaa designation for the first time in 2002.

### **DONATIONS & GIFTS**

Donations include funds donated from individuals, organizations and businesses.

### **FEDERAL-FEDERAL HIGHWAY FUNDS**

The federal highway funds are distributions from the federal government. MnDOT administers these funds for our transportation projects.

### **OPERATIONS/OTHER**

Enterprise and Internal Service funds are funds that derive their revenues from sources other than taxes. They may use these revenues for capital purchases. Some of these funds include Buildings, Motor Pool, Information Technology Solutions, and Waste Management. Private funds received for roadwork could also appear under this category.

### **RESERVES-FUND BALANCE**

Revenues received in a prior year but not spent for a designated project are considered “reserves” and may be carried forward into subsequent years for a project.

### **SALE OF ASSETS**

These are proceeds expected from the sale of equipment or buildings.

### **STATE**

State Bond Fund request.

**STATE-BRIDGE BONDING**

The Minnesota Department of Transportation administers the Federal Bridge Replacement funds. The state finances bridge replacements through a State-bonding program. It is a funding source for all of our bridges. Structures less than 10 feet in length are not considered a bridge and therefore do not qualify for bridge bonding.

**STATE-GENERAL OBLIGATION BONDS**

In October of 2020 the Minnesota State Legislature passed a State Bonding Bill allocating General Obligation Bond Funds for Olmsted County’s cost participation in the Project Development and Construction of the CSAH 44/TH 14 Interchange – 7<sup>th</sup> St Flyover project

**STATE-GRANT**

A financial award given by the state government to an eligible grantee.

**STATE-STATE AID-HIGHWAYS**

State Aid Funds are distributed from the Highway Users Tax Distribution Fund (HUTDF) by formula; 62% to Trunk Highway Fund; 29% to County State Aid Highway Fund; and 9% to Municipal State Aid Street Fund for cities with populations over 5,000. Each county's State Aid allotment is determined by distribution formula based on equalization (10%), motor vehicle registration (10%), lane miles (30%), and needs (50%). The Minnesota Department of Transportation requires that 60% of the state aid funds be used for construction and 40% for maintenance.

**STATE-TOWNSHIP BRIDGE FUNDING**

There are grant monies available from State Aid, which are specific to Town Bridge Construction. Annually, each Minnesota County Highway Department is mailed a Notice of Annual Apportionment; this document shows the new years’ allotment for Town Bridge Construction.

**STATE-TRUNK HIGHWAY BONDS**

In October of 2020 the Minnesota State Legislature passed a State Bonding Bill allocating Trunk Highway Bond Funds for the Minnesota Department of Transportation’s cost participation in the Project Development and Construction of the CSAH 44/TH 14 Interchange – 7<sup>th</sup> St Flyover project.

**TAX-½% LOCAL OPTION SALES TAX (LOST)**

In 2013 the State Legislature allowed counties to enact up to a ½% transit sales and use tax. The Olmsted County Board authorized a ¼% tax in July 2013, to be used for public infrastructure for the Destination Medical Center initiative and other transit and transportation projects in Olmsted County. This ¼% tax became effective 1/1/2014. In March 2017 the County Board approved an additional ¼% tax under MN Statute 297A.33 for transportation. This additional ¼% tax went into effect 7/1/2017.

**TAX-2012 CITY SALES TAX**

In November 2012 the Rochester voters passed an extension of the ½% City sales tax. The original ½% sale tax was approved in October 2005. The Rochester City Council and the Olmsted County Board have agreed to share these revenues. Olmsted County's total share of the 2012 sales tax increase was \$17 million to be used for transportation projects.

**TAX-COUNTY LEVY**

The tax levy funds are derived from the county property tax. The County Board determines the annual amount of tax levy.

**TAX-WHEELAGE TAX**

In July of 2013 the Olmsted County Board of Commissioners adopted a \$10/vehicle wheelage tax for vehicles kept in their county. This tax is due at the time of vehicle registration and is collected by Driver and Vehicle Services (DVS) and then remitted to Olmsted County to be used for transportation needs. As of 2018, Counties are authorized to implement up to a \$20/vehicle wheelage tax, however Olmsted remains at \$10/vehicle.

**UNFUNDED**

Funding for the entire project or a portion of the project is undetermined. The project is shown for planning purposes but there is currently a lack of known funding.

Project Name	Physical Security Improvements

Type Buildings & Other Improvemen      Department Facilities/Building Ops (FBOP)  
 Useful Life 5      Contact Mat Miller, Director of Facilities  
 Category Building Improvements

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$950,000
Ongoing funds for repair, modernization, or upgrades to our physical security systems (camera additions, security lighting, doors/hardware). The Security Committee works to determine both the cybersecurity and physical security priorities.	

<b>Justification</b>
These projects help to maintain and improve important security standards for staff and public who use our facilities.

<b>Budget Impact/Other</b>
Maintaining security prevents tragic events from occurring and takes a proactive approach on building safety.

Expenditures	2023	2024	2025	2026	2027	Total

Project #	FBOP-22-010
Project Name	Deferred Maintenance

Type Buildings & Other Improvemen      Department Facilities/Building Ops (FBOP)  
 Useful Life      Contact Mat Miller, Director of Facilities  
 Category Parks-Deferred Maintenance

Status Active

Description	Total Project Cost: \$741,250
In 2023, deferred maintenance projects consist of Metal roof replacement at two Oxbow maintenance buildings (\$130,000), replacement of the water heater at Oxbow Park building (\$2,250), Chester Woods LED upgrades (\$60,000), caretaker homes maintenance (\$20,000), deferred maintenance budget for smaller various projects per the Facilities Condition Assessment (\$9,000).	

Justification	Addressing deferred maintenance projects avoids a "run to fail" approach for our assets. This item reflects aggregated projects as listed in the Facilities Condition Assessment .

Project #	FBOP-22-018
Project Name	Furniture Replacements

Type Equipment & Furniture      Department Facilities/Building Ops (FBOP)  
 Useful Life 10      Contact Mat Miller, Director of Facilities  
 Category Furniture & Equipment

Status Active

Description	Total Project Cost: \$890,000
In 2023: furniture replacements at 2117 and 2122 conference room (\$25,000) plus general furniture purchases that are in demand each year (\$225,000).	

Justification
We allocate furniture replacements each year to address reconfigurations, upgrades for ergonomics, or existing furniture reaching its end of life. Regular replacement of our furniture helps to properly outfit workspaces and creates improvements to enhance efficiency.

Budget Impact/Other

Expenditures	2023	2024	2025	2026	2027	Total

Project Name	Remodeling For Remote Work Project

Type Buildings & Other Improvemen      Department Facilities/Building Ops (FBOP)  
 Useful Life 20      Contact Mat Miller, Director of Facilities  
 Category Building Improvements

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$1,050,000
Internal groups and committees are working to develop the strategy around long-term remote working. This project identifies funds to execute plans that require design, remodeling, and/or furniture replacements	

<b>Justification</b>
Changes to the policies and practices of how we work must be supported by adequate spaces and environments to ensure success. This project would not expand the footprint of our facilities but would help in increasing density or efficiency of our existing spaces.

<b>Budget Impact/Other</b>

Expenditures	2023	2024	2025	2026	2027	Total

 Project Name Byron and Eyota Shop Exterior Envelopes

Type Buildings & Other Improvemen      Department Facilities/Building Ops (FBOP)  
 Useful Life 20      Contact Mat Miller, Director of Facilities  
 Category Transportation-Deferred Mainte

Status Active

**Description**      Total Project Cost: \$165,000  
 Replacement of metal wall panels at the Byron Public Works Shop (\$150,000) and repair of Eyota windows (\$15,000).

**Justification**  
 The Byron ship roof and fascia panels were replaced in 2020 and the wall panels are now in need of replacement. The Eyota shop window gaskets are failing which will result in water intrusion, or failure of the entire window unit, if not addressed. These projects do not result in additional square footage.

Project #	FBOP-23-004
Project Name	Deferred Maintenance-Building Envelope

Type	Buildings & Other Improvemen	Department	Facilities/Building Ops (FBOP)
Useful Life	20	Contact	Mat Miller, Director of Facilities
Category	Deferred Maintenance		

Status Active

Description	Total Project Cost: \$329,947
In 2023, exterior repairs and maintenance at 2100, 2118 and 2122 buildings. Work in 2024 consists of window replacement at the 2100 and 2118 buildings.	

Justification
The exterior envelopes of the campus buildings, especially 2117 and 2100 are consistently monitored for caulking and joint sealant failure and damage from birds. These sites need repairs generally on a yearly basis to avoid larger water intrusion issues. A proposal for repair services was received in 2020 which provided the basis for the budget for several projects. The delayed projects from 2020, 2021, and 2022 are intended to be spread out across three years to work through the backlog.

Budget Impact/Other

<b>Description</b>	<b>Total Project Cost:</b> \$925,927
For 2023, LED upgrades for 2100, 2117, 2122 and PWSC cold storage building (\$453,821); and replace electrical panels at the 2122 building (\$11,255). For 2024, LED upgrades for west wing of 2118 and Gov Ctr ,excludes courtrooms (\$460,851).	

<b>Justification</b>
LED upgrades were identified as important upgrades for improved maintenance and energy usage in our buildings. LED upgrades at 2100, 2118, and 2122 were originally approved for 2020 and were put on hold. Delayed projects from 2020, 2021, and 2022 are intended to be spread out across three years to work through the backlog.

Project #	FBOP-23-007
Project Name	Deferred Maintenance-Interior Surfaces

Type Buildings & Other Improvemen      Department Facilities/Building Ops (FBOP)  
 Useful Life 10      Contact Mat Miller, Director of Facilities  
 Category Deferred Maintenance

Status Active

Description	Total Project Cost: \$458,255
For 2023, carpet replacement for 2117, 2nd floor and jail cell painting in the ADC (\$180,000). For 2024, the budget of \$267,000 includes carpet replacement for 2117, 3rd floor, 2118 west wing, and Government Center. Also included is interior painting and ceiling tile replacement at 2118. In 2025, office casework will be replaced at 2122, (\$11,255).	

Justification
The useful life of carpet is around 7 years depending on amount of traffic. The useful life of wall paint is around 10 years. Our interior finishes are monitored and repaired when possible and then must be replaced when they have reached a certain amount of wear. The delayed projects from 2020, 2021, and 2022 are intended to be spread out across three years to work through the backlog.

<b>Description</b>	<b>Total Project Cost:</b> \$552,911
For 2023, the budget of \$102,911 includes radiant heating ceiling panels for 2100, fire damper work, VAV recommission allowance at 2100 and engineering work for air handler replacements in 2024 at the ADC and 2122 building. For 2024, the budget of \$250,000 will cover air handler replacements at the ADC and 2122. For 2025, two additional air handlers will be replaced at 2122 at a cost of \$200,000.	

<b>Justification</b>
Modernized mechanical systems ensure we are meeting standards and goals around interior environment quality and system efficiency. The delayed projects from 2020, 2021, and 2022 are intended to be spread out across three years to work through the backlog.

<b>Budget Impact/Other</b>

Project Name	Adult Detention Center (ADC) Upgrades

Type Buildings & Other Improvemen      Department Facilities/Building Ops (FBOP)  
 Useful Life 20      Contact Mat Miller, Director of Facilities  
 Category Building Improvements

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$365,000
Repainting, flooring replacement, plumbing fixture replacement, and adding a door is planned for 2023; LED and lighting control upgrades with ceiling replacement is planned for 2024; steamer replacement is planned for 2025.	

<b>Justification</b>
Upgrades at the ADC are systematically completed as the building's components reach the end of their useful lives or safety issues arise. Cost of construction in the ADC is elevated due to the higher cost of security fixtures and the higher cost of labor. These replacements and renovations improve the longevity of the facility, which will reduce the amount of ongoing repairs needed, especially on appliances and plumbing fixtures. Avoiding failures or extreme wear in high-security areas prevents safety issues.

<b>Budget Impact/Other</b>

<b>Description</b>	<b>Total Project Cost:</b> \$12,000
For 2023, replace the two 5th floor ADC holding cell toilets.	

<b>Justification</b>
Holding cell toilet is aged. When these style toilets fail and need to be replaced, they are out of order for many weeks until the replacement arrives. This project aims to replace before failure.

<b>Budget Impact/Other</b>
Addressing deferred maintenance projects avoids a "run to fail" approach to our assets.

Project # FBOP-23-041  
 Project Name Deferred Maintenance-Roof Systems

Type Buildings & Other Improvemen      Department Facilities/Building Ops (FBOP)  
 Useful Life 20      Contact Mat Miller, Director of Facilities  
 Category Deferred Maintenance

Status Active

**Description**      Total Project Cost: \$3,670,000  
 For 2023, roof replacement at ADC and Government Center tower. For 2024, roof replacement at 2117 building.

**Justification**  
 The roofs are nearing end of life. ADC reroofing was priced out in 2022 however due to construction cost inflation it was determined that additional funding was required.

**Budget Impact/Other**  
 Addressing deferred maintenance projects avoids a "run to fail" approach to our assets.

 Useful Life 5    Contact Mehrdad Shabestari, ITS Manag  
 Category Information Technology System

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$850,656
County's outdated backup systme was replaced with a new system in 2022 and this item reflects the annual lease on that capital expenditure. Lease term was set for five years.	

<b>Justification</b>
This is an Enterprise Backup System, which is responsible for backing up County-wide data unless specifically requested otherwise. This is similar to backing up home computers but on a massive scale and with proper computer security and safety measures. This backup solution will ensure that the County can continue providing Public Safety and other services, while retaining the electronic and digital files according to the retention schedules set by the County Attorneys and others. To provide the best solution for the County, the IT department will provide a bidding opportunity for various vendors. This opportunity will ensure that the County is receiving the best possible value and will remain fiscally responsible to its constituents.

<b>Budget Impact/Other</b>

Project Name	Computer and Storage Replacement

Type Equipment & Furniture                      Department Other Departments (OTHR)  
 Useful Life 5    Contact Mehrdad Shabestari, ITS Manag  
 Category Information Technology System

Status Active

Description	Total Project Cost: \$1,555,508
The County's Compute and Storage solutions were replaced in 2022 and this capital expenditure is reflected in a five-year lease as shown in the Expenditure table below. Line 2 in the amount of \$20,000 is to acquire a tool to better manage the County's server computers, with 10% of the original amount in proceeding years for maintenance and renewal.	

Justification
The Compute and Storage solutions are the technology infrastructure for the County and without these solutions, the County cannot continue its digital operations. The first impact will be the loss of network drives such as S and K drives. All systems rely on this infrastructure, including the HUB, Laserfiche, and others. This cost is for the continued replacement of computer and storage infrastructure to maintain the current level of service for the County. This expanded infrastructure will allow for better recoverability of our systems in case of disaster, whether natural or human-made. The recent COOP exercises exposed some of the vulnerabilities and gaps within our digital operation which has direct negative impacts on the County's business operation. The second line below is the same request but is an expansion to the original request to accommodate improved recovery times.

Type Equipment & Furniture      Department Other Departments (OTHR)  
 Useful Life 5      Contact Mehrdad Shabestari, ITS Manag  
 Category Information Technology System

Status Active

Description	Total Project Cost: \$595,000
In addition to firewalls, an enterprise-level computer network such as the County network, demands other sophisticated tools to disallow intruders from stealing the County's digital assets. These tools allow the technology network team members to monitor activities on the network when they notice suspicious activities and take proper actions. Other necessary tools allow for smooth operation of the public safety's electronic systems.	

Justification
F5 provides application security for our applications including any of our internal custom applications like MOMS, DADS, queuing systems, Caseworks, Laserfiche, and others. These appliances need to be replaced as they are reaching end of life. If we do not replace them, we have no other alternatives. These are an increased security above our firewall. They intercept traffic to our internal resources and secure that traffic.

Project #	OTHR-22-008
Project Name	Security Information Event Management Sys (SIEM)

Type Equipment & Furniture      Department Other Departments (OTHR)  
 Useful Life 5      Contact Michael Stier, IT Security Archit  
 Category Information Technology System

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$565,000
Deploy an enterprise grade event monitoring system to assist in detecting and remediating security incidents as well as ensuring our baseline security posture is adhered to. This system allows us to stop network intrusions in real-time, audit access to sensitive data and detect attempted data exfiltration attempts while ensuring our mandated security posture is adhered to. Central logging and auditing is a key component of security, as we cannot secure what we do not know.	

<b>Justification</b>
Presence of a SIEM system provides real time visibility into our cyber systems, streamlines incident response and provides detailed threat intelligence and audit capability. In addition a SIEM would allow Olmsted to enforce our security baseline posture to help ensure we're remaining compliant with our various regulatory entities. Given the disparate vended software, operating systems and on-premise vs cloud hosted solutions present in our environment the FTE requirement to audit all of our systems far outstrips the implementation and management cost of a fully functioning SIEM. This tool allows us to correlate events from different systems and to ensure audit logging cannot be wiped by compromising applications. The initial deployment of a SIEM will require additional work by ITS staff to both onboard the product and to ensure that current systems are appropriately managed. This will expose previously hidden issues that will need to be remediated and affect availability of resources until corrected. Ignoring these vulnerabilities is a larger liability to the County. Years 4 and 5 can be rolled into another ongoing project for funding.

Description	Total Project Cost: \$50,000
Update office furniture for Human Resources staff to incorporate county wellness and ergonomic goals.	

Justification
Update office furniture to streamline work spaces and maximize work areas. Current furniture is bulky and has been in use for over 20 years. Updated furniture would be more efficient and ergonomic, taking productivity and safety into mind. Installing new furniture will also maintain an aesthetically pleasing work environment.
4 cubes, 3 shared offices, 3 smaller offices, 4 medium office, 2 larger offices = Total estimate \$50,000

<b>Description</b>	<b>Total Project Cost:</b> \$324,000
The county's wireless system provides both county users and citizens access to county electronic resources and to the Internet, according to access privileges. This system, comprised of wireless access point devices installed at various locations, is expiring in 2023 with no available support option.	

<b>Justification</b>	Citizens needing to do business with the county expect wireless connection to be available for their needs. Additionally, county employees, contractors and vendors rely on the wireless system to access various electronic resources when moving around the facilities. Mechanics and other professionals with Public Works Service Center and other facilities also depend on the availability of the wireless connection to do their work. We have already run this system past its end of life. Wireless is more critical now than years past with people in conference rooms, Internet of Things devices (smart devices) including building automation, cell phone connections, and sensors for tracking assets. We are currently purchasing hardware from EBay to keep our system going.

Project #	OTHR-23-007
Project Name	Wireless Infrastructure at Oxbow Park

Type Equipment & Furniture      Department Other Departments (OTHR)  
 Useful Life 8      Contact Mehrdad Shabestari, ITS Manag  
 Category Information Technology System

Status Active

Description	Total Project Cost: \$210,000
Add fiber from the new Oxbow Nature Center and wireless infrastructure to cover the parks.	

Justification
As staff continue to work outdoors at Oxbow, they need wireless to connect to their systems. These are their record keeping, timesheets, and other apps like Office. Since there is no cellular coverage, they will need wireless for their devices. We are also looking to add streaming of the cages to this project and utilize the same infrastructure in a separate secure network. This would also allow us to have a guest wireless for visitors. This is a key component to allow our parks staff and visitors to gain access to our network. Without it, we would be using time to transfer data from paper to digital.

Description	Total Project Cost: \$1,478,000
Yearly physical and cyber security improvements.	

Justification
Security always needs to improve to keep up with the latest threats. This money is allocated by the Security Committee to Cyber and Physical security projects throughout the year. We may have breaches or lose data if we do not secure our cyber infrastructure. Staff need to be kept safe with physical security.

Project Name	ITS Rewiring

Type Improvements Other Than Buil      Department Other Departments (OTHR)  
 Useful Life 5      Contact Matt Peabody, ITS Director  
 Category Information Technology System

Status Active

Description	Total Project Cost: \$2,720,000
Timing of these projects is coordinated with current plans for Justice Tower next phase construction. For 2023, Annex \$100,000, 2118 building, \$90,000. For 2024, Government Center, \$690,000, PWSC \$510,000. For 2025, finish Government Center, \$410,000. For 2026, 2100 building, \$450,000. For 2027, 2117 building, \$470,000.	

Justification
Building networks with old wiring need to be updated to CAT6A. These projects are conducted in tandem with other renovation projects, when possible, to limit costs.

Project #	OTHR-23-016
Project Name	Video Management System (VMS) Replacement

Type Equipment & Furniture      Department Other Departments (OTHR)  
 Useful Life 5      Contact Matt Peabody, ITS Director  
 Category Information Technology System

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$325,000
Our current VMS system is (9) years old. It was once its own entity and over the past several years has been purchased by Tyco and then by Johnson Controls. Johnson Controls now supports (2) VMS platforms and it seems that ours has not been given the attention that is needed to stay current with other systems and features. The main issue that we are experiencing is the lack of camera compatibility with the system. They are not staying current with the camera drivers for the cameras that we use, thus we are not able to integrate them into the system as native cameras, which in turn limits us to the features and functionality of the cameras. This causes issues with programming, system functionality, and on-going maintenance and support.	

<b>Justification</b>
We have contacted and met with our vendor to discuss many of the issues that we are dealing with and have directly worked with the company as well to try and resolve some of these issues. They are basically telling us that they are going to lessen their support on the camera side of things because it is cost prohibitive for them to try and keep up with the numerous changes that are continuously being made to cameras. The impact of not replacing our current VMS will mean less camera functionality and available features, more staff time needed for programming, and more time spent on troubleshooting compatibility issues. We will be able to utilize all the features of our current cameras. Staff will be able to spend less time on set-up, programming, upgrading, and troubleshooting of the cameras. It will also allow us the opportunity to introduce active directory for our clients and to assign access based off client privileges. This will be an automated process.

<b>Budget Impact/Other</b>
On-going annual cost would be equal to our existing on-going cost, which is about \$13,000 per year. This is for a Service Level/Software Support Agreement.

Project #	OTHR-23-017
Project Name	Remote Work Optimization

Type Equipment & Furniture      Department Other Departments (OTHR)  
 Useful Life 5      Contact Matt Peabody, ITS Director  
 Category Information Technology System

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$130,000
Throughout the pandemic and afterwards, we have continued to support remote work. While many applications are optimized for remote work such as Teams, Outlook, our web applications, and other services, some still require extra bandwidth and graphics processing. Many staff in areas such as GIS need to process large amounts of data. We are currently accommodating by using different technologies to let them work remotely. Some include downloading to their local PC and then syncing at a later date. This has the risk of data loss. Some are using a remote session, and this does not work for graphics heavy applications. This request would find a solution to either accelerate access to files in our data center through a WAN accelerator, or add hardware in our datacenter to have users remotely connect to process files. Either solution could be expanded past GIS and other heavy data users to allow a better remote working experience. There is a \$30,000 ongoing annual cost.	

<b>Justification</b>
We are moving towards remote working for many staff. These technologies are proven and have helped other companies and governments to make remote work a viable option for data/graphics-heavy users. This would cut down processing time for data significantly and increase data protection for some of our largest datasets. Updated maps are not available as quickly as possible for many of our apps connected to GIS data such as 911, parcels and tax information, surveying, and a multitude of other applications.

<b>Budget Impact/Other</b>
\$30,000 ongoing

Project #	OTHR-23-018
Project Name	LaserFiche Licensing

Type Equipment & Furniture      Department Other Departments (OTHR)  
 Useful Life 5      Contact Matt Peabody, ITS Director  
 Category Information Technology System

Status Active

Description	Total Project Cost: \$46,500
<p>We pared down our licensing to save costs over the past years and went with a new licensing model for LaserFiche. This request would get us to license the new staff we have taken on over the past 3 years that currently aren't licensed. This would allow us to use Laserfiche for county-wide forms and workflows, where we currently cannot. We have a tool in our toolkit that is not used for certain applications or workflows because not everyone is licensed, this would get us fully licensed for our current user count. Moving some of the projects to custom developed applications. We also have shifted licenses around to accommodate current workflows.</p>	

Justification
<p>While it is not directly revenue generating, saving time and development costs to create paperless processes saves money. If this is not funded some apps may not be developed as fast or in coordination with existing workflows and more time would be needed to develop applications and more projects going to developers rather than LaserFiche team. We could show a return on investment with workflows that were created across the county.</p>

Budget Impact/Other
\$6,534 ongoing

Project Name	RPSTC - Maintenance for Shooting Range

Type Improvements Other Than Buil      Department Sheriff (SHRF)  
 Useful Life 2      Contact Jonathan Jacobson, Deputy Sher  
 Category Sheriff-Regional Public Safety

Status Active

Description	Total Project Cost: \$123,165
Shooting Range Maintenance - Bullet Trap Cleaning (\$24K)and Concrete Surface maintenance (\$5K)	

**Justification**  
 Annual usage of the facility, specifically the shooting range requires cleaning of the traps that absorb the lead rounds of ammunition to ensure the safety of the users as well as ensure that environmentally, we are following required guidelines. The concrete where staff maneuver to shoot also needs maintenance to ensure that the structures stay usable and do not separate or crack which could lead to a liability situation. Currently, usage of the shooting facility is requiring an every 2 year maintenance and cleaning. To ensure safety of all users of the training facility as well conform to the bonding agreement with the State of MN, required cleaning of the bullet traps is required.

Project Name	ADC - Inmate Property Storage Conveyor

Type Equipment & Furniture                      Department Sheriff (SHRF)  
 Useful Life 10    Contact Brian Howard, Dir. of Detention  
 Category Sheriff-Adult Detention Ctr (A)

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$65,000
This is an apparatus that allows for inmate property to be stored in an easily accessible manner.	

<b>Justification</b>
When a person is housed in the ADC, their personal belongings have to be stored until they are released. This storage allows for an easy way to manipulate and maintain this property. We are required to maintain personal possessions until which time, a person being housed at the ADC is released.

Description	Total Project Cost: \$191,000
<p>The Sentence to Serve Program requires the transportation of inmates to various places to provide community service to the people of Olmsted County. There is usually no value on these vehicles at end of life.</p>	

Justification
<p>We need to provide transportation for STS crew members to get to assigned job sites. The vehicles to be replaced in 2022 and 2023 were purchased in 2012 and were scheduled for replacement 2 years ago. Without the ability to provide transportation to various job sites, the STS crew would not be able to provide service to the community.</p>

Project Name	ADC - Employee Lockers

Type Equipment & Furniture      Department Sheriff (SHRF)  
 Useful Life 30      Contact Brian Howard, Dir. of Detention  
 Category Sheriff-Adult Detention Ctr (A)

Status Active

Description	Total Project Cost: \$35,013
New employee lockers at the ADC.	

Justification
The current employee lockers were a part of the building buildout in 1993. These lockers are used daily by employees as they are encouraged to change from personal clothing to uniform at the beginning of shift and then back to personal clothes at end of shift. And because their shifts are 12 hours in length, it provides them their only personal space in the facility for lunches etc. The lockers after being used daily for almost 30 years, need to be replaced. They are broken down with some being unusable at this point.

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$1,500,000
Body Cameras for the Law Enforcement and Adult Detention Center staff. (90 Body worn cameras and 61 Squad video).	

<b>Justification</b>
The County Board agreed that it was in the best interest of our citizens and staff to be able to record incidents as they occur for better clarification of an event for complaints or discrepancies in accounting of an event. This recording is used for many purposes including training, incident management and court cases. Body Cameras are implemented to protect the citizens as well as staff. Without them, we rely on word accounting of an event and many times this leads to wrong conclusions and accounting of events.

Project #	SWST-22-002
Project Name	Loader

Type	Equipment & Furniture	Department	Solid Waste (SWST)
Useful Life	10	Contact	Carl Struckmann, Landfill Super
Category	Kalmar Landfill		

Status Active

Description	Total Project Cost: \$300,000
Replacement loader needed for day to day operations at the landfill.	

Justification
Existing loader is close to its useful life and a replacement is needed to continue to operate the landfill efficiently.

Budget Impact/Other
A new loader will reduce downtime, maintenance costs, but will allow the operators to work more efficiently.

Expenditures	2023	2024	2025	2026	2027	Total
Equipment/Vehicles	300,000					300,000

Project #	SWST-22-005
Project Name	Skidloader

Type Equipment & Furniture      Department Solid Waste (SWST)  
 Useful Life 8      Contact Scott Martin, Waste Abatement  
 Category OCRC (Recycling)

Status Active

Description	Total Project Cost: \$87,000
Purchase new skid loader to replace an old one.	

Justification
Skid loaders are essential to our business operations on a daily basis for moving and processing waste from customers at the Recycling Center. If we do not purchase this new skid loader to replace our oldest one, we will have increased breakdowns and maintenance costs to keep the old one running.

Budget Impact/Other
Systematically replacing old equipment before high maintenance costs and failure is good business practice as it is cost effective and reduces downtime operationally.

Project #	SWST-22-022
Project Name	Control Room Admin Expansion

Type Buildings & Other Improvemen      Department Solid Waste (SWST)  
 Useful Life 25      Contact Matt Anderson, Solid Waste Ope  
 Category OWEF: Operations

Status Active

Description	Total Project Cost: \$240,000
Add/ infill floor above existing 1035 office area.	

Justification
The upgrade of the existing fire pump and controls required more space for the equipment room and controls which resulted in insufficient space for the main floor uniform room and Maintenance Office. Fire code also requires no items to be stored in the stairwells. Rochester Fire Department has granted a variance provided we are working towards a solution. This project will allow reallocaiton of the main floor uniform storage, Maintenance office and Operations kitchen equipment (microwave, coffee pot, refrigerator).

Project #	SWST-23-006
Project Name	MSW Compactor

Type Equipment & Furniture                      Department Solid Waste (SWST)  
 Useful Life 8    Contact Scott Martin, Waste Abatement  
 Category OCRC (Recycling)

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$50,000
Purchase new Municipal Solid Waste (Garbage) Screw Compactor to store and process self-hauled garbage.	

<b>Justification</b>
A Municipal Solid Waste Screw Compactor is projected to provide a minimum 4X compaction rate over our currently used open top containers and also process (size) the waste to be handled better at the OWEF. This would correspond also with 4X less hauls, saving hauling costs. We would also gain experience by using this compactor to determine its full capabilities at the Recycling Center and also have this information should the decision be made to construct a new Residential Self Haul Facility. Replacing an open top container with an enclosed Screw Compactor is projected to provide operational efficiencies and significantly save on hauling costs. If its value is proven, Screw Compactors could replace other open top containers and be more efficient and save money.

<b>Budget Impact/Other</b>

Status Active

Description	Total Project Cost: \$30,500,000
<p>The MRF will enhance the material recovery from the MSW stream by removing specific target materials (e.g., ferrous metal, aluminum, others) prior to waste combustion and prepare sorted materials for sales to the end markets. The MRF will also be capable of accepting and sufficiently sorting single-stream recyclables from the surrounding region and prepare sorted materials for sales to the end markets. The MRF will increase OWEF uptime, reduce maintenance expenses, reduce ash and bypass back-hauling, reduce air pollution control consumables with cleaner burning fuel.</p>	
Justification	Future sustainability of the Olmsted County Integrated Solid Waste Management System.

Project Name	Ambient Air Monitors

Type Equipment & Furniture      Department Solid Waste (SWST)  
 Useful Life 10      Contact Tony Hill, Director of Environm  
 Category OWEF: Environmental Compli

Status Active

Description	Total Project Cost: \$22,255
Purchase and install two ambient air sensors around OWEF to measure air quality (nitrogen dioxide, nitrogen monoxide, carbon monoxide, ozone, and fine particulate matters PM2.5 and PM10). Sensors will also act as a secondary monitoring system to the continuous emission monitoring (CEMS) installed at the facility for monitoring effluent gas streams.	

Justification
"With growing concern in Minnesota with communities where people with low incomes and communities of color might be disproportionately impacted by pollution from industrial sources. Expand geographical coverage of ambient air quality sensors in Olmsted County with the following project objectives:1) Analyze and compare results to data from the OWEF CEMS, and the MPCA's and Rochester Air Network's existing air monitoring networks.2) Monitor for specific chemicals associated with adverse public health effects within and outside an environmental justice area in Olmsted County.3) Determine if there are significant differences between the ambient air community monitor locations and MPCA's existing stationary monitors.4) Share results with Commissioners, neighborhood groups, and the general public."

Project #	SWST-23-28
Project Name	Material Recovery Facility (MRF) Engineer/Design

Type Equipment & Furniture      Department Solid Waste (SWST)  
 Useful Life 30      Contact Matt Anderson, Solid Waste Ope  
 Category OWEF: Fiscal & Asset Manage

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$2,000,000
The engineering and design of the MRF is the first step of the development and construction of the MRF. The engineering and design will include the MRF building, material processing equipment, surrounding grounds, and other general site improvements. The engineering and design will include state-of-the-art processing equipment for recovery of recyclable materials (e.g., ferrous metals, aluminum, plastics, paper, cardboard) and recovery of other non-combustible wastes.	
<b>Justification</b>	
The engineering and design of the MRF is separate from the MRF construction because there is uncertainty for the construction schedule. Separating the engineering and design allows for flexibility to accommodate a construction schedule that anticipates state funding assistance.

Purchase new forklift to replace an old one	

Justification
Forklifts are essential to our business operations on a daily basis for moving and processing waste from customers at the Recycling Center. If we do not purchase this new forklift to replace our old one, we will have increased breakdowns and maintenance costs to keep the old one running. Systematically replacing old equipment before high maintenance costs and failure is good business practice as it is cost effective and reduces downtime operationally.

Project #	SWST-24-006
Project Name	Boiler 3: Wall Tubes

Type Equipment & Furniture      Department Solid Waste (SWST)  
 Useful Life 20      Contact Matt Anderson, Solid Waste Ope  
 Category OWEF: Operations

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$490,000
Project replaces existing Boiler 3 Wall Tubes. This is an essential component of the boiler where water is evaporated to steam and are also called steam generating tubes. These tubes also form the walls of the boiler and thus are called water walls or boiler wall tubes.	

<b>Justification</b>
Required for boiler operation. Non-destructive ultrasonic testing indicates current tube thickness compared to original tube thickness requires replacement to maintain safe operation.

The above report represents the estimated timing of the expenditures for the projects listed in the CIP. In the case of State Aid-Highways and LOST funding sources, they aren't always available the same year that the expenses occur. (See chart below for estimated total receipts by year for each of these funding sources). In years where expenses are estimated to be more than receipts, fund reserves will be used and then replenished in future years when receipts exceed expenses. In years where expenses are estimated to be less than receipts, reserves will build up and be used in future years.

**\*Est. State Aid-Highway Receipts:**

	<u>2023</u>	<u>2024</u>	<u>2025</u>	<u>2026</u>	<u>2027</u>

Project #	TRAN-22-001
Project Name	Seal Bridge Decks

Type Transportation Preservation      Department Transportation (TRAN)  
 Useful Life      Contact Ben Johnson, Project Engineer  
 Category Bridge Improvement/Upgrade

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$1,200,000
Annual sealing of bridge decks at various locations throughout the County.	

<b>Justification</b>
Sealing bridge decks reduces corrosion of the steel reinforcement caused by water seeping through the cracks in the deck.

Project #	TRAN-22-003
Project Name	CSAH 3 Replace Bridge #89155

Type Transportation Improvements & Department Transportation (TRAN)  
 Useful Life Contact Ben Johnson, Project Engineer  
 Category Bridge Improvement/Upgrade

Status Active

Description	Total Project Cost: \$350,000
Replacement of existing cast-in-place box culvert bridge structure over Cascade Creek. The structure is located approximately 1 mile north of CSAH 25 (Salem Road).	

Justification
Structure #89155 is over 80 years old and the Local Planning Index (LPI) is below the replacement threshold of 60. Replacement of our bridge structures are dependent on bridge bond funding.

Budget Impact/Other

Project #	TRAN-22-008
Project Name	PWSC/RPSTC Building-Phase 2

Type Buildings & Other Improvemen      Department Transportation (TRAN)  
 Useful Life      Contact  
 Category Building Improvements

Status Active

Description	Total Project Cost: \$5,350,000
To provide funding for design services of space improvements at the PWSC. Improvements related to space for offices, conference room, copy room, shared computers, reception area, and employee breakroom are needed to accommodate staff, and building use/functionality.	

Justification
Open doorways have been covered with sheetrock to create cubicle space; space intended for storage is being used for staff cubicles; shared computers coexist with breakroom space; maintenance supervisors utilize others' private offices for confidential personnel interactions and phone calls; printers/plotters occupy space in the hallways. Reduced customer service; inefficient delivery of services; improving existing facilities demonstrates fiscal responsibility, rather than bonding for new buildings. Reduced customer service; inefficient delivery of services; improving existing facilities demonstrates fiscal responsibility, rather than bonding for new buildings. The Public Works Department is reimbursed for work performed for townships and small cities. An efficient, well-functioning facility helps operations provide a transportation system that supports the economy and citizens that utilize it. Additional benefits include increased energy efficiency, an extended useful life, and effective operations. In the end, space improvements may require an incremental increase in heating, cooling, and lighting. These small increases would be offset with energy efficiencies.

Project Name	CSAH 44/TH 14 Interchange-7th St Flyover

Type Transportation Improvements & Department Transportation (TRAN)  
Useful Life Contact Ben Johnson, Project Engineer  
Category Road Improvement/Upgrade

Status Active

Description	Total Project Cost: \$61,200,000
Construction of a new interchange at the CSAH 44/TH 14 intersection, including 7th Street flyover.	

Justification
The CSAH 44 intersection with Trunk Highway 14 on the west side of Rochester is at a skewed angle. Traffic volumes, speed, and geometrics present significant safety concerns. \$6 million in General Obligation Bonds for Olmsted County and \$2.54 million in Trunk Highway Bonds for the State of Minnesota have been allocated to the project for Design, Environmental Documentation and Right of Way acquisition. Construction funds have not yet been secured.

Description	Total Project Cost: \$210,000
Replacement of existing steel arch structure. The structure is located approximately 1.5 miles north of CR 124.	

Justification
The steel arch span structure #L6274 is 70 years old and the Local Planning Index (LPI) is below the replacement threshold of 60 (currently 46). Township bridge structures are replaced with town bridge funds, the township is responsible for the first \$10,000 in engineering costs and the first \$10,000 in construction costs.

Project #	TRAN-22-020
Project Name	8ft Disc Mower

Type Equipment & Furniture                      Department Transportation (TRAN)  
 Useful Life 10    Contact Chad Schuman, Hwy Mt Engine  
 Category Furniture & Equipment

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$40,000
8' Disc Mower used to cut the grass in the ditch providing better visibility to the roadway users.	

<b>Justification</b>
Mowers have wear parts that can have limited life with the conditions experienced in the field. Once a mower is not reparable, then it needs to be replaced. The old mower is then used for parts. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Project #	TRAN-22-022
Project Name	Small & Used Equipment

Type	Equipment & Furniture	Department	Transportation (TRAN)
Useful Life	5	Contact	Chad Schuman, Hwy Mt Engine
Category	Furniture & Equipment		

Status Active

Description	Total Project Cost: \$300,000
Miscellaneous small and used equipment.	

Justification
Small equipment will many times break without advanced notice. It may be cheaper to replace than to repair the items. This item is for unforeseen replacement, new or used lower value equipment that may be needed on a short notice. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Budget Impact/Other

Project Name	Crackfill Melter

Type Equipment & Furniture                      Department Transportation (TRAN)  
 Useful Life 15    Contact Chad Schuman, Hwy Mt Engine  
 Category Furniture & Equipment

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$70,000
Crackfill melters melt the sealant so cracks on the roadway can be filled.	

<b>Justification</b>
Crackfill melters have wear parts that can have limited life with the conditions experienced in the field. With the heat generated from this machine, it is important for safety reasons to keep the crackfill melter updated. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$706,000
Skid steers are multi-purpose depending the the type of attachment that is on it. We use them with a bucket, soil conditioner, stump grinder, auger, pneumatic hammer, broom, snow blower, etc. They are used in nearly all of our grading operations.	

<b>Justification</b>
Skid loaders are a high maintenance piece of equipment that is critical to the operation. Skid steers are replaced every 400-600 hours to optimize the warranty and overall cost to own. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Tractors are use primarily in our mowing operation.	

<b>Justification</b>
Replacement schedule for Tractors is every 20 years. This tractor is currently 11 years overdue. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Project #	TRAN-23-011
Project Name	Brine Maker

Type Equipment & Furniture      Department Transportation (TRAN)  
 Useful Life 5      Contact Chad Schuman, Hwy Mt Engine  
 Category Furniture & Equipment

Status Active

Description	Total Project Cost: \$20,000
Brine is a salt and water mixture that many road maintenance crews rely upon to tend to highways during winter weather. Brine doesn't bounce like salt crystals and stays in place better so it does the job it was intended to do – keep roads free of snow and ice.	

Justification
Brine is a salt and water mixture that many road maintenance crews rely upon to tend to highways during winter weather. Brine doesn't bounce like salt crystals and stays in place better so it does the job it was intended to do – keep roads free of snow and ice. The current brine maker is at the end of its useful life and is in need of replacement. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$355,000
A flail mower is a mower that stays permanently attached to a tractor. This mower is primarily used for in-town mowing.	

<b>Justification</b>
Replacement schedule for Tractors is every 20 years and this tractor is due. The flail mower attached to this tractor is the primary reason for replacement. Mowers have wear parts that can have limited life with the conditions experienced in the field. Once a mower is not repairable, then it needs to be replaced. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Project #	TRAN-25-005
Project Name	Wheel Loader

Type Equipment & Furniture      Department Transportation (TRAN)  
 Useful Life 15      Contact Chad Schuman, Hwy Mt Engine  
 Category Furniture & Equipment

Status Active

Description	Total Project Cost: \$480,000
Wheel loaders fill dump trucks with sand/salt during the snow and ice season. They are also used to mix material and carry a heavy duty snow blower.	

Justification
Replacement schedule for Loaders is every 15 years because of the salt environment they are in. Allowing equipment to age excessively will impact reliability of service and will increase the expenditures for repairs.

Budget Impact/Other

Project #	TRAN-25-006
Project Name	Plasma Wet Table

Type	Equipment & Furniture	Department	Transportation (TRAN)
Useful Life	10	Contact	Chad Schuman, Hwy Mt Engine
Category	Furniture & Equipment		

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$20,000
Plasma Wet Table is a new piece of shop equipment to cut steel. It is needed for the fabrication of repair parts for the equipment.	

<b>Justification</b>
The Plasma Wet table will improve the feasibility to fabricate parts that typically have long lead times to order and high dollar values. This will allow for equipment to be put back into service in a timely manner. Could potentially reduce costs of high dollar parts and allow equipment to be put back in service in a more timely manner.

Project #	TRAN-25-007
Project Name	CR 142 Replace Bridge #1628

Type Transportation Improvements & Department Transportation (TRAN)  
 Useful Life Contact Ben Johnson, Project Engineer  
 Category Bridge Improvement/Upgrade

Status Active

Description	Total Project Cost: \$150,000
Replacement of existing concrete slab span bridge structure. The structure is located approximately 0.5 miles east of Dover.	

Justification
Existing Structure #1628 is over 100 years old and the Local Planning Index (LPI) is nearing the replacement threshold of 60 (currently 69). Replacement of our bridge structures are dependent on bridge bond funding.

Project #	TRAN-25-010
Project Name	Surveying Drone

Type Equipment & Furniture      Department Transportation (TRAN)  
 Useful Life      Contact Mark Severtson, County Survey  
 Category Furniture & Equipment

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$15,000
Replace 2017 DJI Matric 200 Drone.	

<b>Justification</b>
The life expectancy of a drone is approximately 5-10 years, depending on care and use. Upgrading takes advantage of new technology, increases productivity and decreases repair costs and downtime. This equipment is used 2-3 times a month and saves significant time compared to manual surveying methods. Replacing before problems arise will decrease the chances of a costly failure during flight.

Project Name	Hot Patch Trailer

Type Equipment & Furniture                      Department Transportation (TRAN)  
 Useful Life 20    Contact Chad Schuman, Hwy Mt Engine  
 Category Furniture & Equipment

Status Active

<b>Description</b>	<b>Total Project Cost:</b> \$55,000
A hot patch trailer is used to keep bituminous asphalt hot prior to placement on the road while filling potholes.	

<b>Justification</b>
Hot patch trailers are essential on being able repair potholes. This is the most efficient way to heat the material and transport it to the needed locations. Repairing potholes is a necessary fuction in our maintenance activities. If they were not repaired, complaints would be received and there is a potential for liability.

## **20 YEAR TRANSPORTATION PLAN**

Olmsted County, like many communities across the country, is finding it difficult to keep up with the demands of building and improving infrastructure and continuing to preserve the existing infrastructure. Olmsted County's Public Works staff have inventoried the entire highway and bridge system and developed an engineer's plan for preservation and improvements to the transportation system.

The total estimated costs of the projects are identified in the plan. However, the various funding sources have not been identified. Depending on the project, money can be obtained from state, federal and other local sources. The total obligation shown in the 20 year plan is not Olmsted County's share of the costs, but is the total estimated cost. Staff believes by identifying the needs we can begin to make decisions about our infrastructure priorities.

Many projects can be delayed without immediate impact to the community. An objective of the County is to preserve the existing infrastructure to maximize the life of the road before reconstruction is required. This is the best investment and produces the lowest long-term costs. Based on this objective the pavement preservation program should address 15 miles of bituminous roads per year.

The 20 year plan also includes many community projects that are currently being discussed. These include interchanges, safety projects, bikeways and railroad improvements.

Olmsted County has elected to bring forth the total cost from all funding sources to inform local, state and federal elected officials to the amount of the need. The immediate safety concerns are being met. However, without increased support from all levels of government continued improvements to the transportation system will be difficult.

**Olmsted County**
