

# Jurisdiction Lookup Instructions

<https://webapp.co.olmsted.mn.us/IASJurisdictionLookup/AddressSearch/index>

Click the link above to open the Jurisdiction Lookup tool.

There are two ways to search a property's jurisdiction in this site: by parcel ID or by address. If you are searching by parcel ID you will need to enter all 12 digits with no periods or dashes. If you are searching by address, the best way to search is by entering the house number and the street name/number only. See example below for searching the address 8370 Highway 14 SE, Eyota.

It is important to note that when searching by address less is more and the street name field should not include terms such as Avenue, Street, Highway, etc.

Once you have your search results, you can click the parcel ID for the corresponding result. If there are more than one result, double check the owner/address/city and select the appropriate parcel ID. If there is a duplicate parcel ID, you can click either one and the results will be the same.

On the Property Information page, you will see the address, parcel ID, section, township, range, and town/city information at the very top. You can click the appropriate jurisdiction information section to see who to contact for each of the building/planning/zoning services listed on the page.
